

SBC JESEL Std Cam Location Complete Kit

Fuel pump mounting holes can be used with the FPMD (Fuel Pump Magneto Drive) to put the magneto out front and off the top of the engine.

There are two sets of mounting holes to provide an 12 degree offset should it be needed. The offset can go CW or CCW depending which way the front plate is mounted.

The hardened drive pins drive from the JESEL front hub and connect to the adapter hub. The 3/8" hex drive bolts to the adapter hub.

Bolts washers and spacers are provided for a complete installation kit.
