

Crower Stack Injector Barrel Valve - Riser Block Kit

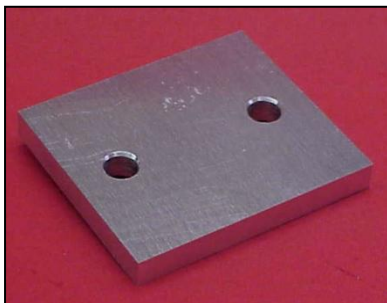

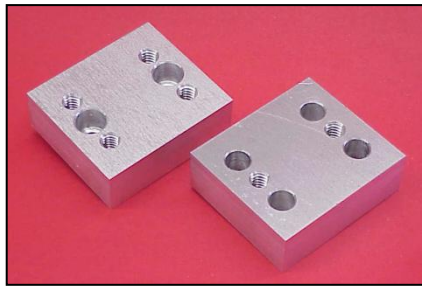

Having the barrel valve buried in the middle of the Crower Stack Injector makes it difficult to near impossible to adjust the idle volume or remove the hose connecting to the secondary check valve. Raising the barrel valve and extending the hex link makes access to these components easier to adjust.

20mm Adapter Kit Part Number 35060-47522

Retail Price \$100.00 +

Racer Decal Discount Price \$ 85.00 +
